OBJECTIVE

Software Developer specializing in building reliable, user-focused web and mobile applications. Experienced in full-stack development, problem-solving, and collaborating with clients to turn ideas into scalable, high-quality solutions. Passionate about clean code, modern technologies, and delivering results that help businesses grow.

EDUCATION

Adventist University of Central Africa — *Kigali, Rwanda*
Bachelor of Arts in Information Technology
September 2022 – December 2026

WORK EXPERIENCE

Software Developer — Freelancer

January 2025 – Present

- Full-stack freelance developer specializing in React.js, Node.js, Python, Java, and MySQL.

- Developed scalable and client-driven web applications focused on solving real-world problems.

- Built clean and maintainable systems that enhance operational efficiency and user experience.

- Collaborated with clients to translate business needs into functional, high-quality software solutions.

PROJECTS

Rwanda Fines Tracker

React, Node.js, RESTful API, MongoDB

- Developed a web application that provides automated reminders for upcoming traffic fine payment deadlines.

- Helps vehicle owners avoid late fees and promotes compliance with Rwanda's traffic regulations.

- Designed with a focus on usability, accessibility, and real-time data accuracy.

NEXUS-HOUSE

HTML, CSS, JavaScript

- Built a static business website for a multi-service commercial building.

- Showcases business activities under one platform with clean UI and responsive design.

Sports Facility Management System

Java, MySQL, Hibernate, JDBC

- Designed a system to monitor and control core activities of a sports facilities center.

- Implemented booking, facility tracking, and data management features for operational efficiency.

SKILLS

Programming: Java, C, HTML, CSS, JavaScript, React.js, Node.js, Python, MySQL
Languages: English (Professional Fluency), Kinyarwanda (Native), Swahili (Beginner)
